

Section 12. Optional Modules January 2010

SFI Inc. has developed a process for the *SFI* program to address emerging issues and new opportunities, such as start-up templates for new Program Participants, carbon markets, short rotation woody crops for bioenergy feedstock production, *conservation* easements, etc. through optional modules developed by *SFI Inc.* and approved by the *SFI Inc.* Board of Directors. These modules will provide implementation assistance using case studies or optional certification requirements to address specific issues of benefit to the *SFI* program. Any modules developed prior to the next standard review process in 2014 will be added in this section.
