

WOOD IS GOOD FOR GREEN BUILDING

Wood is a renewable, durable resource

Using wood products from responsibly managed forests in green building is key to keeping forests as forests

Forest certification standards, including SFI, are a proof point that wood comes from responsibly managed forests

SUSTAINABLE FORESTRY INITIATIVE

Good for you. Good for our forests.®

ISN'T IT TIME WE RECOGNIZED ALL CREDIBLE FOREST CERTIFICATIONS?

10

–The percentage of world's forests that are certified

75

–The percentage of certified forests in North America not eligible for the wood certification credit under the current LEED® certification policy

99

–The number of U.S. Congressmen and Governors who have publicly urged the USGBC to recognize all credible forest certification standards

6,000+

–The number of supporters who have signed a petition to open LEED certification to all credible forest certification standards

SUSTAINABLE FORESTRY INITIATIVE

Good for you. Good for our forests.®
